The University of Angers invites you to the 4th Annual PANORisk conference which takes place at the Faculty of Law, Economics and Management on December 12 and 13, 2019. PANORisk is a regional project sponsored by Région Pays de la Loire and involves researchers in economics, finance and mathematics from five academic institutions, namely University of Angers, University of Le Mans, University of Nantes, Audencia Nantes and ESSCA School of Management.

The aim of the PANORisk project is to promote scientific research in the field of risk measurement, valuation and management and to develop methodologies and tools which may assist decision-makers in the area of investment, insurance and new types of risk.

The conference theme is “The Roadmap of Long-Term Value Creation” and it will be an opportunity for academics and professionals to have a dynamic scientific exchange on the challenges and regulatory priorities raised by the changing corporate and financial environment in specific fields such as (but not limited to):

- Corporate Governance and Risk Management;
- Market microstructure and High Frequency Trading;
- Information Disclosure and Market Liquidity;
- Environmental Risks and Corporate Social Responsibility;
- Alternative Investments and Asset Innovations;
- Financial Regulation;
- Systemic Risk and Financial Stability
- Non-standard Monetary Policy Measures;
- Savings and Retirement;
- Insurance
Charlotte Østegaard is Professor of Finance at BI Norwegian Business School after holding a position of Research Officer at the Financial Markets Group at the London School of Economics. She is graduated from Brown University with a Master of Arts and Ph.D in Economics. She is currently the Director of the Center for Corporate Governance Research (CCGR) at the BI Norwegian Business School. She has a rich teaching experience in different fields of economics and finance including Financial Intermediation, Credit Markets, Corporate Finance and Financial Management, Derivatives and Risk Management. Her research, focused mainly on banking and corporate governance, has been published in top-tier academic journals such as the Journal of Finance, the Review of Financial Studies, the Review of Finance, and the Journal of Political Economy. She is currently working on topics related to the governance in Norwegian industrial corporations in the early 20th century and entrepreneurial firms.

Jeffrey Pontiff is Professor of Finance at The Wallace E. Carroll School of Management, Boston College, Massachusetts (USA) and the Director of the Chair James F. Cleary in Finance. He holds a Ph.D in Business from the University of Rochester and has taught in various institutions, e.g., University of Cambridge (Judge Business School), Ecole Polytechnique Fédérale de Lausanne (Switzerland), National University of Singapore, ESCP Europe Paris, Harvard Business School. His research focuses on corporate finance and capital markets. His work is published in top-tier academic journals such as American Economic Review, Journal of Finance, Journal of Financial Economics, Review of Financial Studies, or Management Science and was awarded prestigious research prizes like the Jensen Prize and the Amundi Smith Breeden Prize. He is currently an Advisory Editor of the Journal of Wine Economics, the Executive Editor of the Review of Asset Pricing Studies and an Associate Editor of the Journal of Financial and Quantitative Analysis. He also was Associate Editor of the Review of Financial Studies (2006-2009), and Management Science (2009-2014).

PANORisk’s (Investments, Insurance and New Risks) main objective is to develop and design tools to help decision makers in the areas of savings plan, management of potential risks related to the issues of aging, health, climate change, economics, political and financial crisis or financial institutions credibility. PANORisk aims to promote scientific research in the field of risk management and help investors and policymakers in the area of product placement, insurance and new types of risk.

The project promotes the interdisciplinarity among different scientific fields, such as mathematics, management and economics. The program is focused on three main research topics as follows: Risk measures and sustainability of public security systems (Modelling and New Risks measures), Behaviour in uncertainty: Insurance demand, investment and savings, and Interaction between agents, contracts designs, regulation, new financial products.

PANORisk is based on a cooperation partnership among three Public Universities and two Business Schools:

- University of Le Mans: Research lab Group for the Analysis of Itineraries and Wage Levels (GAINS), Manceau Mathematical Laboratory (LMM) and the Risk and Insurance Institute of Le Mans (IRA)
- University of Angers: ANgevin Research Group in Economics and Management (GRANEM) and Angers Laboratory for Mathematics Research (LAREMA)
- University of Nantes: Nantes–Antlantic Economics and Management Laboratory (LEMNA)
- Audencia Business School
- ESSCA Management School

This project is funded by the Region Pays de la Loire under the Dynamic Scientific Research Program and has received the habilitation from the scientific council of the MSH in 2016.

The PANORisk network includes more than 70 researchers, 7 laboratory, 5 institutions and multiples regional, national and international collaborations.
PANORisk Coordination Team:
François LANGOT (University of Le Mans) – PANORisk Project Coordinator
Laurent DENIS (University of Le Mans) – Scientific Coordinator
Xavier FAIRISE (University of Le Mans) – Scientific Coordinator
Frédéric KARAME (University of Le Mans) – Scientific Coordinator

The Angers Economics and Management Research Group (GRANEM) is an interdisciplinary research group at the University of Angers and a member of a CNRS research federation on “work, employment, and public policies” (TEPP). GRANEM is composed of 55 professors, 44 doctoral students, 2 post-doc, and 5 administrative and technical staff.

THREE MAIN RESEARCH AREAS

Environment, Health, Work and Food (ESTA)
The ESTA sub-group studies the influence of current societal questions on the behaviour of various economic agents, as well as their implications in terms of public policies. This research is organised around four main themes. The first one deals with the degradation of the environment and global warming. The second focuses on issues of public health and the aging of the population. Research related to these two themes deals with the monetary assessment of non-market assets such as the environment or health, modelling behaviour and analysing decision-making in the face of environmental and health risks. The third theme analyses changes in the labour market and the functioning of firms. It focuses on labour-market adjustments, organisational changes and innovations, human resource policies, and their impact on the employment relationship (involvement, workplace emotions, well-being). The fourth theme addresses consumer concerns about food practices and questions consumer trends (sensory marketing, brand management).

Tourism, Territories and Culture (TTC)
The research of this sub-group is structured around three themes. The paradox of «glocalisation» leads us to question the stakes of territorial specialisations in a globalised exchange context (clusters, networks), especially in the tourism and culture sectors (theme 1). We also study questions of authenticity and values in the fields of tourism and culture, and the challenges of co-production of experiences that they induce (theme 2). Finally, we analyse the dynamics of cultural and tourism-sector transformation driven by new technologies, and the evolution of public policies, taking into account the tension between tradition and innovation that these transformations cause (theme 3).

Finance, Regulation and Governance (FRG)
The research carried out within the FRG subgroup focuses on topics related to the implications of recent economic and political reforms. It studies financial activities and regulations within the context of globalisation, technological innovation, and accelerated bank disintermediation. It analyses the long-run impact of these activities and regulations on the real sector. Theme 1 deals with the interactions between traditional and new agents involved in the long-term financing of European firms. In particular, it studies governance
issues pertaining to the contractual relations between firms and their lenders. Theme 2 deals with changes in financial-agent behaviour (savers, investors, financial intermediaries) and financial innovation, as well as with regulatory challenges and institutions.

All GRANEM Research focuses on two cross-cutting issues:
- The behaviour of agents and the transformation of organisations,
- The evaluation of public policies, standards, and institutions.
